SUMMARY

Software developer with 7 years of experience, focused on mobile (Flutter) with complementary work in front-end (Angular) and back-end (Spring Boot). In recent years, I've been part of the team responsible for developing digital products for the Tocantins State Government, working end-to-end on full-stack projects. I work with clean code and a strong focus on usability.

SKILLS

Mobile: Flutter, Dart, Dio, Drift, SQLite, Firebase, get_it, go_router, ChangeNotifier

Mobile practices: offline-first, data synchronization, REST API integration, unit testing, push notifications, app store publishing, Material Design, Flavors

Front-end: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Vue.js, React

Back-end: Java, Spring Boot, REST APIs, PostgreSQL, MySQL, PHP/Laravel

Architecture & DevOps: Clean Architecture, MVVM, MVC, Design System, Git, Docker, Linux, Shell Script

Soft skills: Autonomy, proactivity, ownership of delivery, clear communication, team collaboration, and technical documentation.

PROFESSIONAL EXPERIENCE

Software Developer, NEWCODE Soluções Tecnológicas

Allocated to the Tocantins State Information Technology Agency (ATI) · Palmas, TO · Remote
· Mar 2024 to Present

Responsible for developing digital platforms for the Tocantins State Government, working autonomously across mobile, front-end, and back-end layers depending on the project.

Censo Aquícola (Aquaculture Census) (in production)

- Built the end-to-end platform that digitized the state's aquaculture production census. In production since May 2026, it is used by more than 30 field technicians across all 139 municipalities of Tocantins, with over 800 producers already registered.
- Built the field application (Flutter), fully offline-first, allowing technicians to collect data in rural areas without connectivity and automatically sync once reconnected.
- Implemented the census questionnaire as a reactive form with conditional validations, geolocation, and photographic evidence capture, reducing field data collection time.
- Delivered the web management panel (Angular) with role-based access control, allowing the agency to monitor, validate, and edit data submitted by technicians.
- Designed the API (Spring Boot) integrated with ATI's internal APIs, with database version control (Flyway) and change auditing.

Other deliverables

- Developing PronTO, the Tocantins Services Portal (in development): the mobile app (Flutter) that gives citizens access to the state's public service catalog, and the refactoring of the backend proxy (Spring Boot) that integrates it with the portal's API, with launch expected in 2026.
- Developed the LAB63 Innovation Lab portal (Angular and Spring Boot), which gathers and showcases the Tocantins State Government's innovation projects. inovacao.lab63.to.gov.br
- Maintained and refactored legacy systems, ensuring stability and prioritizing good development practices.

Software Developer, CRP Tecnologia

Palmas, TO · Hybrid · Jul 2022 to Dec 2024

- Worked on web applications for public sector organizations (Angular, Vue, Laravel, Spring Boot), including systems for the Tocantins State Audit Court (TCE-TO), the Mato Grosso Regional Electoral Court (TRE-MT), and the Espírito Santo State Government.
- Developed mobile applications (Flutter) for Android with offline support, role-based interfaces, and segmented push notifications.
- Optimized the CI/CD pipeline (Azure DevOps), automating APK build and distribution.

Software Developer, Clic Performance Web (Grupo Agência Public)

Palmas, TO · On-site · Jul 2021 to Jul 2022

- Led technical development of institutional websites, landing pages, and internal tools (Vue.js, JavaScript, WordPress/PHP), based on Figma prototypes.

Software Developer, CRP Tecnologia

Palmas, TO · On-site · Jan 2021 to Jul 2021

- Developed web backoffice applications (Vue.js 2, Laravel) for public and private sector clients.

Front-End Developer & Intern, Agência Public

Palmas, TO · On-site · Aug 2019 to Dec 2020

- Delivered responsive websites (HTML, CSS, JavaScript, WordPress) with a strong focus on design fidelity, and was responsible for deploying all websites and landing pages.

EDUCATION

Technologist Degree in Internet Systems · IFTO - Federal Institute of Education, Science and Technology of Tocantins · Palmas, Tocantins, Brazil · 2019 to 2023 · GPA: 90.74/100

High School Diploma & Technical Degree in Internet Information Technology · IFTO - Federal Institute of Education, Science and Technology of Tocantins · Palmas, Tocantins, Brazil · 2016 to 2019
